

Standards based closed networks

IEEE 5G Summit 2019 Levi, Finland

Tapio Rautava, UROS Ltd

Tapio Rautava

- Director, Strategic Partnerships at UROS
- 30+ years experience in the global wireless telecom and semiconductor industries
- Previously, positions at Spreadtrum Communications, Broadcom, Renesas Mobile and Nokia

Agenda

- Introduction to UROS
- Use cases: IoT and 5G
- Summary and key takeaways

UROS today

Delivering turnkey IoT solutions for various verticals, bringing benefits of digitalization to people, devices and processes

Timeline

expansion

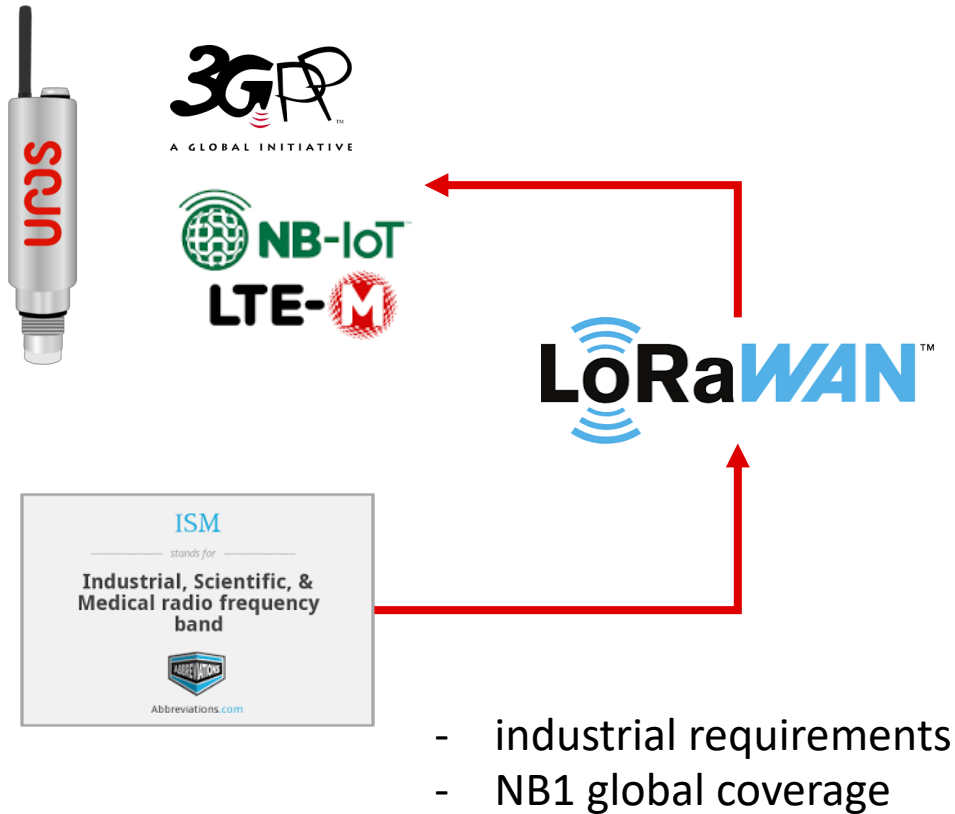

3GPP and GSMA standards

An aerial night photograph of a city, showing illuminated streets and buildings. A thick red diagonal line runs from the bottom left towards the top right, dividing the image. The text 'Use cases:' is positioned on the white background to the left of this line.

Use cases:

IoT commercialisation
& 5G Demo

IoT use case

5G demo

Findings & Summary

1

- Need for "combined" wide and narrowband radios
- Battery run operations

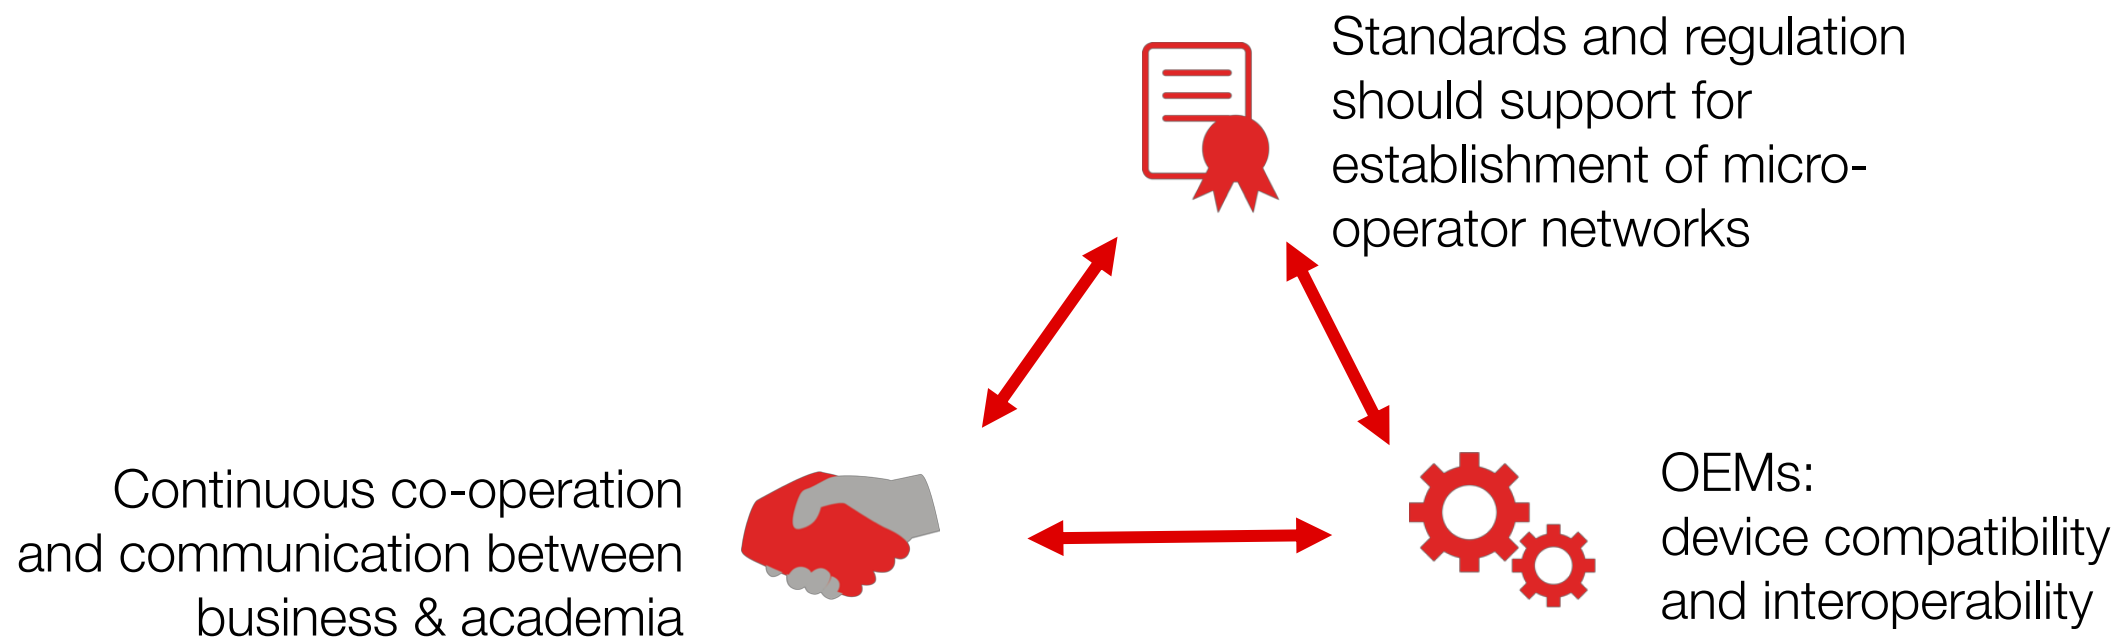

2

- Local mobile networks

3

UROS wants to co-op with academy and other industry actors in order to adapt and enhance its services to utilize 5G opportunities

Key takeaways

Future innovations made today
